Dear Representative Tauzin:

Winnebago Cooperative Telephone Association (WCTA) provides a full range of quality, reliable telecommunication services and products to communities in north central **Iowa** and south central Minnesota serving over 8,300 customers.

WCTA, like many other rural telephone companies, made investments in our telecommunications equipment to resolve the 'telemarketing nuisance calls' when requested by our customers.

We call our service, "Telemarker Call Screening". I have attached an excerpt from our newsletter describing the feature, and **also** enclosed a brochure.

I am writing to express my concerns of the development of a national 'do-not-call' database **list**, and the cost to individual carriers, such as WCTA, to maintain the database. Especially when I have already made an investment to provide a service to my customers to block telemarketing **calls**.

Why develop a "do-not-call" telemarketing list, and create additional governmental bureaucracies, when there already **is** a means to block the telemarketing **calls** for customers requesting the service?

Sincerely,

Terry Wegener
